Project Name	RISING WATERS
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Flood-prone communities often lack timely flood warnings and real-time water level information. This delay makes it difficult for residents to prepare, evacuate safely, and protect lives and property. Raising Waters aims to provide a smart flood monitoring and early warning system to improve safety and reduce flood-related risks.

Example:

I am	I'm trying to	But	Because	Which makes me feel
				
A resident living in a flood-prone area	Protect my family and property during floods	I don't receive timely flood warnings and water-level updates	There is no real-time flood monitoring and early warning system	Worried and unsafe during heavy rainfall

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A resident living in a flood-prone area	Protect my family and property during heavy rains	I don't receive timely flood warnings or accurate water-level information	. There is no reliable real-time flood monitoring and alert system	Worried and unsafe during the rainy season
