Project Name	RISING WATERS
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the implementation of the Rising Waters project. The solution provides flood prediction and water level monitoring using machine learning. The code is well-structured, modular, documented, and follows coding best practices to ensure accuracy, maintainability, and ease of future enhancements.

Instructions:

1. Ensure the code is modular, well-commented, and follows Python coding standards.
2. Implement the core features: user registration/login, water level monitoring, flood prediction, and alert notifications.
3. Include all source code, configuration files, datasets, and setup instructions.
4. Upload the complete project to GitHub and provide the repository link. **Solution Summary**

Field	Details
Repository Link / URL	Paste your GitHub Repository link
Programming Language(s)	Python
Framework(s) Used	Flask, Scikit-Learn, Pandas

Key Features Implemented	1.User Registration & Login 2.Water Level Monitoring 3.Flood Risk Prediction 4.Real-time Flood Alerts 5.Dashboard & Report Generation
Pending / Incomplete Features	1.Live Weather API Integration 2.SMS/Email Alert Service 3.Mobile App Support
Setup / Run Instructions	1. Install Python and required libraries. 2.Open the project in VS Code. 3.Run app.py. 4.Open the application in the browser

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The Rising Waters project was successfully designed and implemented using Flask, HTML, CSS, and JavaScript. The application predicts the possibility of rising water based on rainfall, humidity, and cloud cover inputs. The project was tested successfully, documented properly, and uploaded to GitHub.
