

No. of Functional Features Included in the Solution

Date	30 June 2026
Team ID	XXXXXX
Project Name	RISING WATERS
Maximum Marks	5 Marks

Functional Features Overview:

This document describes the functional features implemented in the Rising Waters project. The system is designed to monitor water levels, predict flood risk using machine learning, provide real-time alerts, and help users access flood-related information. Each feature contributes to improving flood preparedness and public safety.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration	Allows users to create an account	Authentication	Done	1
2	User Login	Secure login using email & password	Authentication	Done	1
3	Water Level Monitoring	Displays real-time water level data	Monitoring	Done	1
4	Flood Prediction	Predicts flood risk using ML	Prediction	Done	1
5	Alert Notification	Sends flood warning alerts	Notification	Done	1
6	Dashboard	Shows water level and prediction status	Dashboard	Done	1
7	Location Selection	Allows users to select an area	Location	Done	1
8	Report Generation	Generates flood reports	Reports	Pending	1

Feature Summary:

Metric	Count / Value
--------	---------------

Total Features Planned	8
Total Features Implemented	7
Core / Must-Have Features	1. User Registration & Login 2. Water Level Monitoring 3. Flood Prediction 4. Alert Notifications 5. Dashboard

Additional / Nice-to-Have Features	1. Report Generation 2. Location Selection 3. Future Weather API Integration
Features Tested & Verified	1. Registration 2. Login 3. Water Level Display 4. Flood Prediction 5. Alerts 6. Dashboard

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Login, Dashboard
2	Backend / Logic	2	Flood Prediction, Alert Processing
3	Database / Storage	2	User Data, water level Data
4	API / Integration	1	Weather / Water Data API
5	Security / Authentication	1	User Login & Registration
