

Demonstration of Proposed Features

Date	2 July 2026
Team ID	XXXXXX
Project Name	RISING WATERS
Maximum Marks	1 Mark

Demonstration of Proposed Features:

The RISING WATERS project demonstrates an AI-based flood prediction system that analyzes rainfall, river water levels, and weather conditions to predict possible flood risks. The implemented features were successfully tested and demonstrated to ensure accurate prediction, timely alerts, and effective visualization of flood-prone areas.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Rainfall Data Collection	Collects rainfall data from available datasets	Implemented	Yes	Working Successfully
2	Water Level Monitoring	Monitors river and water levels	Implemented	Yes	Accurate Results
3	Flood Prediction Model	Predict flood risk using AI/ML	Implemented	Yes	Successfully Tested
4	Risk Level Classification	Classifies areas into Low, Medium and Risk	Implemented	Yes	Working Correctly
5	Alert & Notification System	Sends flood warning alerts	Implemented	Yes	Notifications Generated

Feature Implementation Summary:

Total Features Proposed	5
Total Features Implemented	5
Total Features Demonstrated	5
Overall Implementation Rate (%)	100%
