Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	Resident / Weather Service	External entities that provide rainfall data or receive flood alerts.
Rectangle with numbered header	Raising Waters Process	Collects sensor data, analyzes flood risk, and generates alerts.
Rectangle (solid fill, no number)	Flood Database	Stores rainfall, water level, and flood history data.
Labeled arrow	Data Flow	Represents the movement of data between users, sensors, processes, and the database.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
